Hannah,

Thank you for taking the time to talk with me this morning. It's wonderful to hear you are working with government, private and nonprofit partners to create a resource network for client services.

The Environmental Protection Agency can email you information materials on environmental issues that may relate to Hurricane Harvey. For example, we have information on mold, indoor air quality, carbon monoxide, disposal of household hazardous waste, clean drinking water, and restoration of wastewater systems. I've attached an example of the types of materials we can provide.

Please send me an email or give me a call if you need environmental information or assistance from EPA. I can also drop by if a face-to-face discussion would be fruitful.

Thank you,

Wenona Wilson
